

## Python

[For more info](#)

### Declaration, Assignment

```
variable_name = value
```

### String traversal, properties etc.

```
variable_name = "Hello World"  
variable_name[index]  
Variable_name[:index]  
variable_name[index1:index2]  
variable_name[index:]  
  
len(variable_name)
```

### List/Tuples

```
list_a = [value1, value2]  
tuple_a = (value1, value2)  
len(variable_name)
```

### Loops

```
for i in range(n):  
    pass
```

```
while condition:  
    pass
```
